## Experience

### **CONTRACTOR + WEB/GRAPHIC DESIGN/ DEVELOPMENT JULY 2013 - PRESENT**

I began working with Tim from Eternal Works about a year after moving to Virginia. I reached out to him via a cold call and we have been doing great work ever sense. Some websites we've developed are <http://sailhappytime.com/>, <http://agwraps.com/>, <http://bodylogicvb.com/>, and more.

### **CONTRACTOR + WEB/GRAPHIC DESIGN/ DEVELOPMENT JUNE 2012 - PRESENT**

I began working with Matt from Web Tech Media shortly after moving to Virginia. I reached out to him via a contracting position listing and we have been doing great work ever sense. Some websites we've developed are <http://newhere.com/>, <http://www.farmargives.org/>, <http://farmlive.com/>, and many more.

### **CONTRACTOR + ONLINE SPECIALIST, JG-TC JUNE 2012 - JULY 2013**

After working with the JG-TC as a full-time employee the previous year, I was hired on as a contractor to continue my position remotely. This was a huge step for them as a company since before this everything had been done in house. They felt that my skills and work ethic were so desirable that they would like to keep me remotely while they attempt to find someone locally. The estimated contract length for this was about 1-3 months. I worked here for a full year before parting ways.

### **ONLINE SPECIALIST + PRINT DESIGNER, JG-TC MARCH 2011 - JUNE 2012**

I was offered this job after a conversation I had with my supervisor-to-be in a restaurant I was waiting tables at. During my time here I helped to reshape how a number of things were done and brought the team up to speed with current technology and ideas. Together we created some beautiful print pieces and advertisement. I also was fully responsible for all of the online flash advertisements for customers and helped with the rebranding of their website using BLOX CMS by Town News.

### **CONTRACTOR + WEB/GRAPHIC DESIGNER/DEVELOPMENT JUNE 2010 - PRESENT**

I began working with Bette from Valley-Technologies shortly after my final year in college. She has served as a mentor, teacher, and friend as well as the Project Manager for all of the sub-contract work she sends my way. A few sites I've put together while working with her are <http://www.glacierspringsadventures.com/>, <http://sparks-unlimited.com/>, and <http://communitychirocenter.com/>.

## Education

**ITT Technical Institute** - Milwaukee, Wisconsin — Visual Communications

**Juda High School** - Juda, Wisconsin — High School Diploma

## Programs / Software

### **Photoshop CS2 and Up**

Advanced raster image editing and photography color correction.

### **Illustrator CS2 and Up**

Vector Graphic and Logo Design

**InDesign CS2 and Up**

Pagination and Typography

**Flash CS2 and Up**

Flash websites and web-standard compliant advertising.

**DreamWeaver CS2 and Up**

Used as a tool for quick HTML, CSS , and JS editing.

**Premier & After Effects CS2 and Up**

Video composition and design

**Quark Express 7 and 8**

Print ad creation and pagination when InDesign isn't an option.

**Mac OS X 10.5 and Up**

This is my OS of choice. I use Mac OS X for nearly all of my work.

**Windows XP, Vista, 7, 8, and 8.1**

I have worked on all of the modern Windows operating systems.

## Programming Languages

**HTML**

I am fluent in HTML as the backbone of my web design. I am familiar with the HTML5 doctype and strive to bring as much compatible HTML5 modern code into all of my work.

**CSS**

I use CSS as the skin of my web design. I am efficient in many CSS3 styles and aware of their benefits and downfalls with current browsers.

**PHP**

I know enough about PHP to edit and create child themes in Wordpress, however I would not call myself a PHP expert just yet. I know it's syntax and work with it often. I am in the process of learning more PHP.

**Javascript**

As a novice Javascript user, I know enough of it's syntax to make some edits and tweaks to pre-existing code. I've used jQuery plugins on a number of projects and I'm a very quick learner. I am currently actively learning more Javascript via online programs.
