HTML & CSS

These are the basics of all front-end web development. I'm skilled and fluent in both and use both on a daily basis.

PHP

This is the backbone of WordPress. I use this on a daily basis to build custom child themes for my clients in WordPress.

Javascript & jQuery

I am not an expert at JS, but I understand the syntax and use it jQuery libraries regularly in my projects.

Software

I've worked with Photoshop, InDesign, Illustrator, Flash, DreamWeaver, Premier, After Effects, Quarkxpress, and many other tools of the trade.

Most my work these days doesn't involve anything except **Photoshop CC2** and **Notepad ++**.

Experience

Zealous Sites / Owner, Developer, Project Manager

May 2010 - PRESENT, HOME

I opened my business in 2010 building small websites for restaurants and other small businesses. I've grown it and my skills considerably over the years.

Valley-Technologies / Lead Web Developer

June 2010 - PRESENT, MILWAUKEE

I began working with Bette from Valley-Technologies shortly after my final year in college. She has served as a mentor, teacher, and friend as well as the Project Manager for all of the sub-contract work she sends my way.

Eternal Works / WordPress & HubSpot Developer

July 2013 - PRESENT, VIRGINIA BEACH

I began working with Tim from Eternal Works about a year after moving to Virginia. I reached out to him via a cold call and we have been doing great work ever since.

Education

ITT Tech / Visual Communications

June 2008 - May 2010, MILWAUKEE

I received my degree in Visual Communication and made connections to get my business started. I was trained in all of the Adobe Suite during my time at ITT as well as some 3D modeling.

Juda High / High School Diploma
